SUMMARY

Mid-level Software Engineer with 4 years of experience specializing in TypeScript and React. Demonstrated expertise in building and deploying **full-stack** dynamic web applications, with multiple production-ready projects delivered successfully. Known for a product-minded approach, strong soft skills, and the ability to learn and adapt exceptionally quickly.

EXPERIENCE

Software Engineer

Portion Capital   **May 2024 - Present, Dallas, TX**

· Developed a robust ticketing application for managing maintenance on 200+ physical assets, improving operational efficiency.
· Created a scalable VOIP application for the customer success team, supporting over 300 weekly calls and enhancing customer interactions.
· Engineered a web-based daily audio content platform serving 6,000+ active users, delivering a seamless user experience.

Software Engineer

Tide Cleaners   **January 2022 - May 2024, Dallas, TX**

· *Role eliminated due to company-wide layoffs*
· Developed a unified web portal for nation-wide Tide Cleaners customers across multiple domains, enhancing user experience and streamlining access.
· Rebuilt a legacy website using modern frameworks, generating $4M in annual revenue through improved performance and user engagement.
· Led an optimization initiative for an internal tool, achieving a 76% reduction in JS/CSS bundle size and cutting page load times by 58%.

Software Engineer

CrateBind   **March 2021 - January 2022, Dallas, TX**

· Developed web applications and marketing pages using React and TypeScript, integrated with Ruby on Rails, delivering intuitive and seamless user experiences.
· Enhanced internal tooling and contributed to the company's component library, ensuring consistent and efficient development workflows.
· Maintained high performance standards, ensuring all active projects achieved PageSpeed scores of 90 or above.
